

Gardening for everyone

Statement of Capability

Company overview

At Adaptable Gardens we focus on bringing sustainability, regeneration and connection back into the garden maintenance world. We recognise the importance of caring for the land, and no matter how big or small the job, this is at the core of what we do.

We aim to provide all of our clients with a high-quality service that ensures satisfaction from start to finish. We create and maintain spaces that people can connect with.

Based in the Dandenong Ranges, Melbourne, our team has experience in all aspects of gardening and strata maintenance.

Adaptable Gardens is part of the Adaptable Collective, a group of companies dedicated to supporting each other through sustainable practices.

Adaptable Harvest Protection—part of the Adaptable Collective—helps people grow their own food by building practical, reliable solutions like large netted enclosures, irrigation systems, vertical hobby-farm setups, and greenhouses.

Services

Adaptable Gardens is a multifaceted business. With our gardening ethics backed in permaculture, we're always looking for ways to enhance the gardens we care for.

Garden Maintenance

Adaptable Gardens provides complete garden maintenance, delivered by a skilled team who genuinely love their work. Services range from one off clean ups, ideal for getting a garden back on track or preparing a property for sale, through to comprehensive, year-round maintenance plans.

Garden Maintenance - Aged Care

We're proud to support clients on aged care packages with thoughtful, reliable garden care. For many older clients, the garden remains a cherished part of life, even as maintaining it becomes more challenging. We take the time to understand each person's connection to their outdoor space, communicate clearly, and deliver work that aligns with what matters most to them.

Strata Maintenance

Adaptable Gardens specialises in strata maintenance, allowing strata companies to have confidence that the properties they manage will be well cared for, ensuring resident satisfaction.

We get to know the residents and committee members so that we look after the space in a way that respects those that use it most.

Key Capabilities

Personalised approach

We don't quote over the phone. Every property and every job is unique, so we take the time to complete a site visit first to understand the client's needs. We then create a plan and tailor a quote accordingly. We value our relationships with our clients so ensure that we're available to answer any questions or enquiries.

Trusted

As a garden maintenance service, we pride ourselves on reliability and trustworthiness. All of our staff have police checks so that our clients can ensure that they can trust us to work on their properties. We aim to communicate with our clients for any changes in schedules or to clarify any services required.

Sssshh... We're quiet!

As gardeners, we love to get going in the morning, but we also understand that not everyone is a morning person. We get to know our clients and work our schedule around them when we can. We are also investing in more battery equipment to add to our product range to ensure there is less noise on every job we do.

Connection

This is our biggest point of difference. We don't just look at what needs maintaining aesthetically, we look at how we can improve a space. Soil health is considered and how we can reinvigorate an area. It doesn't matter if it's a patch of grass, or a pot plant in the kitchen, we all need a connection to nature. We are continuously looking at how we can create those spaces for clients.

Suburbs.

Scope of Works

Garden Maintenance

- Lawn mowing of both small spaces and large blocks. We have the equipment for every block size.
- Edging of lawns to ensure that pathways are kept clear.
- Pruning of plants including de-heading of flowers and seasonal fruit tree pruning.
- Hedging to a height of 4 meters.
- Weeding of shared garden beds and weed control in pathways and driveways.
- Removal of green garden waste when requested.
- Use of blower/vacuum to remove fallen leaves to aid in reduction of blocked drains and gutters.

Strata Maintenance

We also deliver the following services:

- Blow down of all common areas including pathways and driveways.
- Pressure washing of common areas including pathways and driveways.
- Surface level cleaning of shared indoor spaces.
- Non-qualified handyman services like changing of light bulbs in common spaces or replacing anti slip strips on stairs, saving money by not relying on other trades

Aged Care

When working with older clients, we know it's about more than gardening. We focus on:

- Listening and communicating clearly to understand each client's needs.
- Maintaining safe outdoor spaces by clearing pathways, reducing hazards and supporting clients with reduced mobility.
- Building trusting relationships with sensitivity to the vulnerability some clients may experience.
